JOHNSTONE MAKES ALTITUDE RECORD
AFTER PERILOUS FIGHT IN CLOUDSFuel Is Almost Exhausted
When He Discovered Dangerous
Situation and
Started for EarthEXCEEDS HEIGHT
OF 8,000 FEETTeams Chosen for Bennett
Cup, and Contest For
Prize Starts Today

NEW YORK, Oct. 28.—The crowd at Belmont Park today was all for Ralph Johnstone when from Middle Island village, L. I., 55 miles from the course, he brought back a new American record of 8,471 for altitude. This is the second record he has added to his string at the international meet.

"I tell you what boys," Johnstone said when he landed, "it was just the mercy of Providence that saved my neck. When I thought I was within reaching distance of a new world's record I forgot all about the wind and began to reach out for more height. Then suddenly I said to myself 'young man, better see how much gas you got.' It's true that it was just enough to turn over the two propellers. When I kept her nose up, the juice ran down into the engine, she coughed a minute and I pointed down and when I lost my fuel she began to miss."

"It was just like shooting the chutes. First I'd take a header with the power off and when the wind began to carry me out of control I'd point up a bit to get a little headway, rub on a level for a hundred yards and then dip again. I was not much scared until I got down to earth and saw what a sale it was. Then I was frightened. The only spot I could find to land was a little patch not three times bigger across than the stretch of wings."

"While losing patience with myself the wind turned me clean around and landed me front, end backwards, but that was just what saved me. If I'd come down head first the wind would have picked me up, tipped over the machine and smashed me to pieces."

The selection of the Aero club of the American team to defend the Gordon Bennett international speed trophy was made today. It had been intended to narrow the choice by elimination trials, but the wind and weather forbade. Hamilton with his 110 horsepower Hamiltonian; Drexel 50 horsepower Bleriot; Brookings, new Wright racer, were named by election and Curtiss, who brought the cup to this country, will have no part in the defending. Substitutes are Mars on the Curtiss team; Moissant, Bleriot and Hoxsey, on the Wright team.

The French team consists of Laitham with a 100 horsepower Antoinette; Leblanc, 100 horsepower Bleriot; Aubrun with 100 horsepower Bleriot, and Simon and Barriat each with 50 horsepower Bleriot for substitutes.

Great Britain's team is Graham, White, 100 horsepower Bleriot; Radley, 50 horsepower Bleriot; McCardie, a Bleriot is the substitute.

There was no flight today to the Statue of Liberty because the wind was too high. Moissant and de Lesseps both tried, but neither finished.

Audemars, one of the two men in the world who dares to drive a tiny Demoiselle, took his butterfly out to try the wind and capsize. In attempting to land from a height of not more than 10 feet he struck the earth with his front wheel, bounced into the air and ended by turning a somersault. For a moment the machine stood tall upon its nose and then turned slowly over on its back. As the crowd jumped to its feet in horror, Audemars leaped out unhurt. He broke a propeller of the machine and smashed the ribs on the wing, threw his engine out but the repairs will not be expensive.

The Liberty flight is still open tomorrow and flights for the Gordon Bennett cup may begin any time after 8:30 a. m.

FIRST BISHOP

PHILADELPHIA, Pa., Oct. 28.—In all the Roman Catholic churches of Philadelphia a special mass was celebrated today in observance of the one hundredth anniversary of the consecration of Rev. Michael S. P. Bishop Egan was the first bishop of the Philadelphia diocese.

CONVENTION LISTENS TO
ANTI-SALOON LEAGUERS

Prohibitionists Are Given Hearing
Before Delegates—Suffragettes Decline to Make
Arguments.

PHOENIX, Oct. 28.—The feature of today's session in the constitutional convention was the public hearing before the committee on separate submission for state-wide prohibition at an election for the ratification of the constitution. There was large attendance in the galleries and the speeches of the local prohibitionists were well applauded. Though a provision had been made for replies no answer was made to the arguments of the prohibitionists. It is understood a majority of the members of the members of the committee are against the separate submission, but a minority report will undoubtedly be made and the matter fought out in the convention floor next week.

The suffragettes are also given opportunity today to speaking for a separate submission for woman suffrage, but they failed to avail themselves of the opportunity on the ground that they were not asking a separate submission, but an incorporation provision of equal suffrage in the constitution. They will have a public hearing before the committee on suffrage elections next Wednesday.

The railroad committee reported adversely to the Cassidy anti-pass proposition today, but will report a substitute carrying the main feature of that measure to prohibit public officials from accepting railroad passes and providing a penalty for railroads offering them.

The labor committee reported against the employment of convict labor on roads and bridges, one member of the committee only opposing. The legislative committee will report on the initiative and referendum bill tomorrow the draft being completed with the exception of the percentages which will be left to the convention. It is not likely that the matter will be submitted until the draft of the proposition is printed, probably Tuesday, upon the direct legislation of matters to be threshed out in the committee of the whole.

Another feature of today's meet was the introduction of a proposition by of Maricopa county, giving the state legislature the power to create the

LYNCH OF OPINION
DEAL IS LEGITIMATE

PRESIDENT OF THE NATIONAL
LEAGUE BELIEVES HERMANN'S
CLAIMS ARE PROPER

NEW YORK, Oct. 28.—Thomas J. Lynch, president of the National league today made his first statement on the controversy between the Philadelphia and Cincinnati clubs, over a deal in which eight players are involved.

Lynch said: "So far all I know about the controversy I have learned from the newspapers. As I understand the case, Manager Dootin of Philadelphia, entered into an agreement with Manager Griffith, of Cincinnati, by which Pitcher McQuinn and Moten, Third Baseman Grant and Outfielder Bates, of Philadelphia were to be transferred to Cincinnati for Pitchers Beebe and Rowan, Third Baseman Lobert and Outfielder Paskert. Horace Fogel, president of the Philadelphia club, objects to the deal saying Dootin, his manager, has no authority to make it. While I do not want to prejudice the case I am inclined to think that President Hermann, of Cincinnati, who knows thoroughly every rule regulating baseball and who is a stickler for living up to the rules himself and for everybody else living up to them, must have something to back up his assertion that the deal is perfectly legal in a baseball sense, or he would not be so insistent of his claims to the four Philadelphia players."

NEW YORK, Oct. 28.—"If Taft continues to make as good a president as he is making now it will be natural that he will be an inevitable candidate in 1912 unless one thing happens, and that is the people of the United States shall repudiate his administration." This statement was made tonight by United States Senator Elihu Root, in a speech at Manhattan Casino when Root addressed himself particularly to those Republicans who might stand willing to vote against the republican gubernatorial candidate for the sake of rebuking Theodore Roosevelt.

WILL NEVER SEE EACH
OTHER, BUT ARE TO WED
NEW YORK, Oct. 28.—Al
though they will never see one
another, Miss Beryl Clarke and
William N. Goehman are
to be married next Thanksgiving
day. Both are blind, but
so is love, and their romance
has brought light and happi-
ness into the darkness of their
lives. "It was his voice that
drew me to him first," she
said yesterday, when asked
how the romance started.
"Some people, I suppose, will
think it unwise for two blind
persons to marry; they will
say that one at least should
be able to see, but we do not
look at it in this way. Why
should there be windows on
only one side of the house?"

MULCT LAW IS
ONCE MORE AN
ISSUE IN IOWA

Campaign That Creates National
Interest Nears End
With Republicans Hope-
ful of Winning Most Offices

DES MOINES, Ia., Oct. 28.—Only ten more days and the political campaign, which has kept things in a turmoil in this State, will come to an end, to culminate in the election in November 8, which will dissipate all mist and bring clearness in the political situation. Both the leading parties will continue their campaign work energetically to the closing moments and the presence of ex-President Roosevelt, who is expected here next week to deliver several addresses in the interest of some of the congressional candidates of the Republican side, is expected to arouse more than ordinary interest in the closing scenes of this important campaign.

The gubernatorial campaign has been conducted with considerable vigor on the part of the democratic candidate, Claude R. Porter, who has been touring the State for nearly a month and has had the oratorical support of William Jennings Bryan, who delivered addresses in his interest in several localities. Governor B. F. Carroll, candidate for re-election upon the Republican ticket, has given comparatively little time to his campaign work. He seems to be confident of re-election and the Republican leaders, believing that the democratic candidate has practically no prospect of winning in the contest, have concentrated their efforts mainly upon the congressional campaign in the districts in which the critical situation seemed to demand special efforts in behalf of the Republican congressional candidates.

The Republicans base their confidence of success in the gubernatorial contest principally upon the "Mulct Law" issue. This law, which operates as a bar against prosecution under the prohibition law which is still on the statutes and is operative in about sixty counties, is exceedingly unpopular with the Democrats, who have gone on record as opposing it and have pledged themselves to abolish it. In its place they propose to adopt a law which would give the saloon access to cities of every size, when a majority of the community should vote, by secret ballot, for the admission of the saloon. It is estimated that this system would restore the saloon to hundreds of towns from which it has been excluded since 1884. The Republicans, who endorse the present "Mulct Law", are of the opinion that this issue will induce thousands of Democratic voters who are opposed to the saloon, to support the Republican candidate, thus insuring his election.

As to the situation in the various congressional districts, it may be said that in most of them it is rather doubtful. In the first district the fight is quite close, but the Republicans are confident that Congressman C. A. Kennedy will be re-elected over J. A. S. Pollard, the democratic candidate, and the Democrats do not insist upon denying this claim.

In the second district, heretofore represented by a Democrat, Charles Griffl, the Republican candidate has been making a vigorous fight and it is expected by the Republican side that Col. Roosevelt's assistance next week will turn the tide in favor of Mr. Griffl, who is classed among the progressives. The Democratic candi-

STEEL STOCK TAKES
BIG RISE IN PRICE

REACHES HIGHEST QUOTATION
SINCE LAST APRIL—SUFFERS
RELAPSE.

NEW YORK, Oct. 28.—The shrinkage today in the total transactions in the stock market coupled with a marked rise in proportion of dealings in United States Steel had some connection with a feeling of suspension engendered toward the market operations in that stock. The price lifted at one time to 89 1/4, which was higher than it has been since April last. Individual transactions at that level pointed to almost exclusive participation by operators of large caliber. The burden of realizing sales at that point aroused doubts of progress of the movement for a rise. The general list moved closely in sympathy with United States Steel and the day's transactions in the stock reached 189,900 shares out of a total for all stocks of 539,100 shares. The dealings in Union Pacific and Reading combined were less than the dealings in Steel. In a sharp relapse Steel went to the final prices being a little changed on the day.

The day's subtreasury statement showed \$6,442,000 cash was withdrawn from the banks for the week. There was another \$1,000,000 in gold engaged for export to Canada. Money on call in New York held down to 3 1/2 per cent, or below, in spite of the near approach of November requirements.

A sharp break in New York Smelting was an unsettling influence on the ground list. Criticism of the financial plan reported to be in contemplation for an adjustment of relations with subsidiary smelter companies had a depressing effect on the stock.

Bonds were irregular. Total sales par value reached \$1,454,000. U. S. bonds were unchanged on call.

REVOKE LICENSE.

SAN FRANCISCO, Oct. 28.—Capt. James Miller, pilot of the British steamer Damara when that vessel went ashore Oct. 8 during a dense fog at Fort Point, had his license revoked by the pilot commissioners today for a period of three months.

Government's Action In Forcing
Unpopular Candidate
Upon People Leads to
Serious Affair

REVOLUTIONISTS ARE
READY TO STRIKE BLOW

Rebels Mass Along Frontier—
Nationalists Are Jailed to
Quell Disturbance

LONDON, Oct. 28.—A dispatch to the Times from Montevideo by way of Buenos Ayres says: "The situation in Uruguay is very grave. The opponents of Jose Battle Y. Ordonez, a candidate for president, are massing revolutionary forces."

"The armed revolutionaries are gathering mostly at the frontier. The press is being censored."

"The telegraph wires have been cut by the revolutionists. The train service in the republic is demoralized."

"Several arrests of nationalists have been made at Montevideo and elsewhere."

"The resignation of Foreign Minister Rachine was requested on account of his sympathy with the revolutionary movement, and his opposition to Senior Ordonez's election."

"There is no question that the government is foisting on the country a most unpopular candidate who is an enemy of progress and financial development. Hence the uprising."

SCHEFFELS HEARING

MILWAUKEE, Wis., Oct. 28.—A hearing to determine whether Benjamin Scheffels, Milwaukee manager for the stock brokerage house of B. H. Scheffels & Co., shall be extradited to New York for trial was begun this morning before United States Commissioner Bloodgood in this city. The home office in New York and all the branch offices of the Scheffels concern throughout the country were recently raided simultaneously by government officers on the allegation of the government that the firm has been operating what is practically a gigantic chain of bucket shops. Benjamin Scheffels is resisting extradition on the ground that the government has no right to take him to New York for trial when no specific offenses have been alleged against him.

INDICT SEVERAL FIRMS

SAN FRANCISCO, Oct. 28.—Charges of violations of the pure food and drug act by the federal grand jury for the northern district of California brought indictments here today against six well known manufacturing firms. Four counts were brought against the California Fruit Canner's association on charges of adulteration of jams. In one count the association is charged with shipping from this state strawberry jam which not only contained no strawberries, but was made of substances unfit for human consumption. The other firms charged are the Lewis Hacking company, Gordon Syrup company, D. Ghirardelli company, Schlesinger & Bender, liquor refiners and Fleisman & Clark company.

TWO STEAMERS ON ROCKS

SAN FRANCISCO, Oct. 28.—The steamer Charles Nelson, bound for this port with a cargo of lumber from Seattle, was wrecked on rocks near Point Reyes, 10 miles north of the Golden Gate tonight. A wire less call for help was received here and preparations were being made to send a revenue cutter to her assistance when the United Wireless received word that the steamer had moved off under her own steam after having lost her rudder and that the steamer Carlos was bringing her in to port. A second steamer went ashore a few miles north of Point Arena on the Mendocino Coast. Her name was not learned. She got away from her perilous position after discharging part of her cargo.

ORDERED TO START WORK.

EL PASO, Oct. 28.—Engineers in charge of the Elephant Butte dam at Engle, N. M., today were authorized by the secretary of the interior to proceed with the work of what is known as "force account." Under the order, all contracts are to be estimated on the work done directly by the government. The work will cost \$7,000,000.

LAYS CORNER STONE

MARBLEHEAD, Mass., Oct. 28.—Governor Eben S. Draper was the principal speaker this afternoon at the laying of the corner-stone for the new building of the Marblehead Y. M. C. A. The event was attended by interesting exercises.
